

When the “Open Zoom Meetings?” message box appears

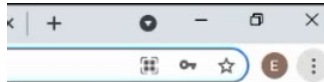

Upon clicking the green **Join** button in your purchased course, you get this message box:

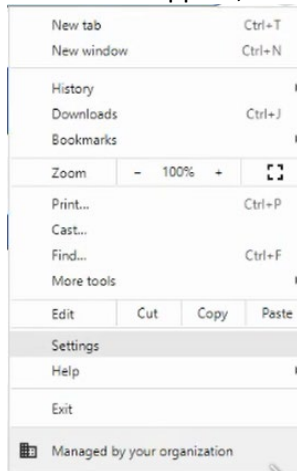

- Click on the **Open Zoom Meetings** button
- If you want to allow the Zoom pop-up all the time going forward for your Think Small Institute trainings (recommended) also click in the box next to “Always allow...”

You don’t get the above message and nothing seems to happen when you click the green Join button

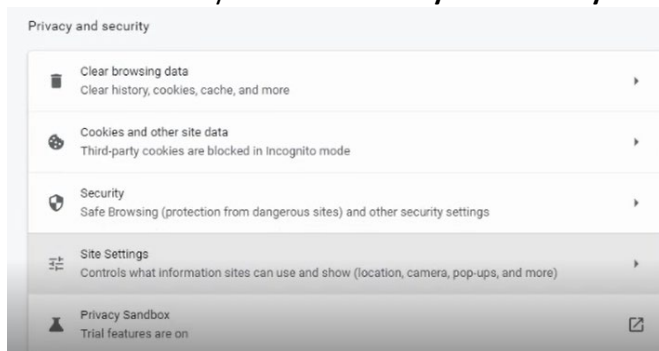

Click on the small icon in the far upper-right corner with 3 vertical dots in a circle:

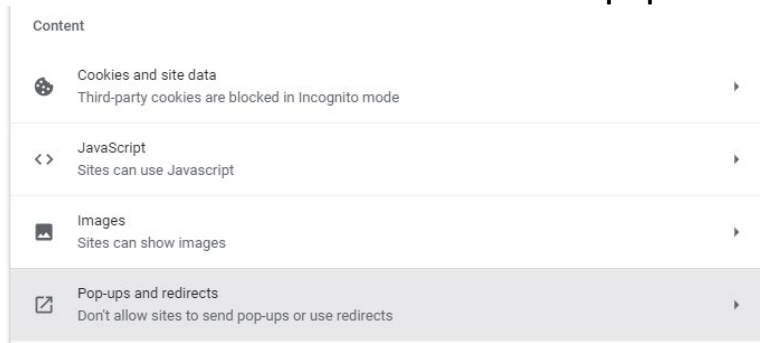

A menu will appear; click on the **Settings** option:

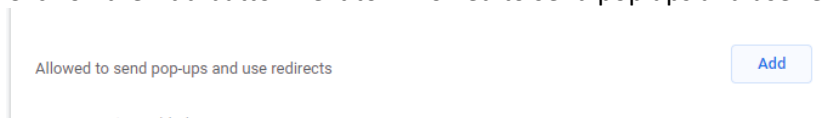

Scroll down until you see the **Privacy and Security** section and click on **Site Settings**:

Scroll down to the **Content** section and click on **Pop-ups and redirects**:

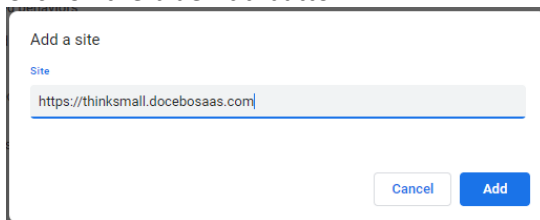

Click on the **Add** button next to “Allowed to send pop ups and use redirects”:

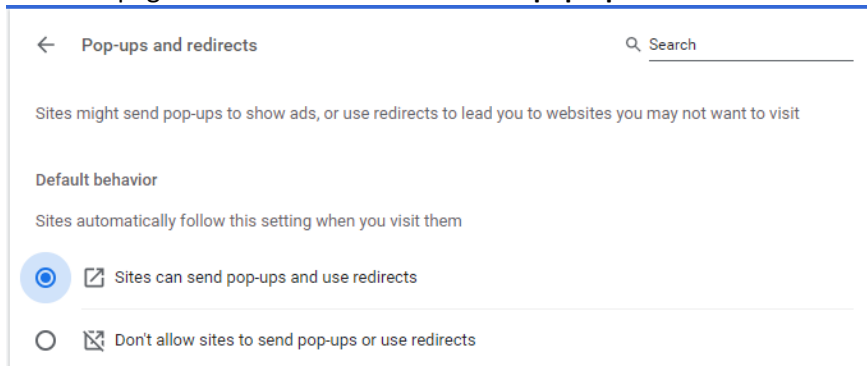

In the **Site** box, enter the following web address (recommended: copy from here and paste it into the box):

https://thinksmall.docebosaas.com

Click on the blue **Add** button:

If you are not able to get the web address set as an allowed pop-up, go back out to the Pop-ups and redirects page and check the **Sites can send pop-ups and use redirects** option:

It will then be set – no need to do any further saving or restarting of browser.
